

Improved Calibration Data Management Increases Flexibility and Efficiency in the Calibration Process

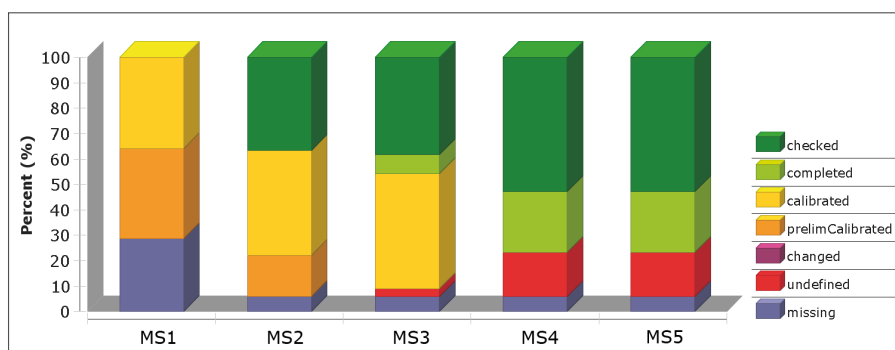

Cooperation between calibrators and data integrators improved

STUTTGART, June 28, 2010 – Vector introduces the new Version 3.0 of its calibration data management tool eASEE.cdm. The tool’s new database-supported parameter handling offers many advantages in managing calibration data.

The new database-supported storage concept in eASEE.cdm enables flexible, format-independent and efficient management of calibration data. Significant new features: Full traceability of changes, informative reports, extended documentation options for calibration results and an extended roles and rights concept. As a result, eASEE.cdm promotes optimal teamwork between calibration engineers, data integrators and project leaders.

Company management benefits from a comprehensive overview of calibration history, detailed reports and progress analyses – all with increased flexibility.

About Vector Group (Revised: June 1, 2010):

Vector is the leading manufacturer of software tools and software components for networking of electronic systems based on CAN, LIN, FlexRay, MOST as well as multiple CAN based protocols.

The Vector know-how is reflected in a wide range of tools as well as in integrated consulting services with software and systems engineering. Workshops and seminars complete the manifold training program. Customers from the automotive engineering, the commercial vehicle, transportation and control technologies around the world trust in the solutions and products from the independently-owned Vector Group.

Vector Informatik GmbH was founded in 1988. About 860 employees work for Vector Informatik and Vector Consulting Services in Stuttgart or in one of the subsidiaries in USA, Japan, France, Great Britain, Sweden, the Republic of Korea, India and China. The group's revenue in 2009 was 96 million Euros.
