

Commitment charter for the training welcome of persons with disabilities

Vector France is committed to providing a service adapted to persons with disabilities (PWD), enabling them to exercise their right to equal opportunities and thereby facilitating their access to employment and/or ensuring their employability.

Our training programs are accessible to persons with disabilities through various measures:

- > A preliminary interview to assess needs and jointly define appropriate support actions.
- > Legal, educational, and technical monitoring to raise awareness of welcoming persons with disabilities.
- > Guidance for persons with disabilities towards professional stakeholders in the disability sector, according to their needs.

Our commitments:

1. To welcome and listen to requests from persons with disabilities without discrimination.
2. To adapt our intervention and training methodology.
3. To raise awareness among the entire educational, technical, and administrative team regarding the reception of persons with disabilities.

We guarantee a personalized welcome that takes into account your needs and expectations.

Together, we will assess the compatibility of your training objectives with your disability and propose appropriate adjustments whenever possible or refer you to another provider if necessary.

Marie-Anne Angebeau

Disability Officer – Vector France
