Quick Setup Guide
Vector Discovery Kit

1 Power up your Kit

Unpack the WiFi-Dongle and insert it in one of the USB ports.

Use a USB-C power cable which supports 9V >= 3A and plug it into the USB PD port of your Vector Discovery Kit.

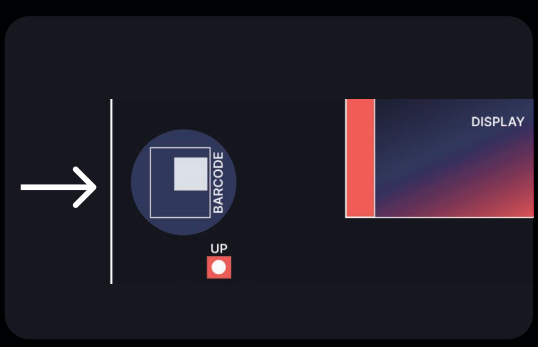

Make sure the power switch is set to ON.

2 Connect WiFi

Use the BARCODE scanner of your Vector Discovery Kit to scan a WiFi-QR-Code from your WiFi router or your mobile phone.

You can also enter the WiFi network and password manually, by using the buttons on the Vector Discovery Kit.

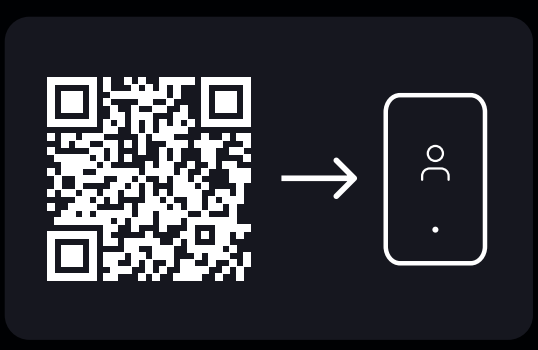

3 Log in with Vector ID

Therefore scan the QR-Code with your mobile phone or use the link: www.nexthorizons.com/discovery-kit

Login or register a new account.

Tap NEXT on the Vector Discovery Kit to verify that you have opened the web app.

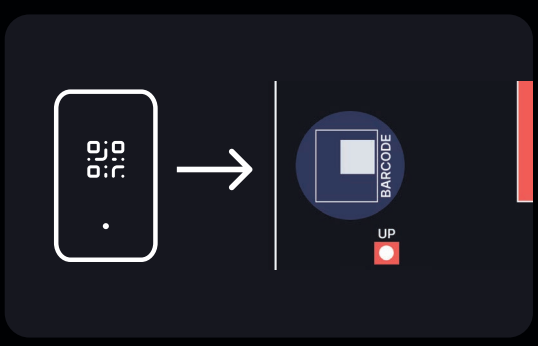

4 Register your Device

Scan the registration QR-Code displayed on your mobile phone or laptop with the BARCODE scanner of your Vector Discovery Kit.

You can also enter the registration code manually.

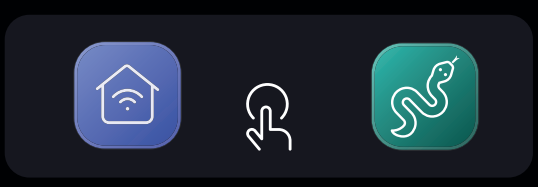

If prompted with a System Update, click on “Update”.

5 Explore the Demos

Choose one of the Demos to install it, you can switch between them at any time.

Happy exploring!

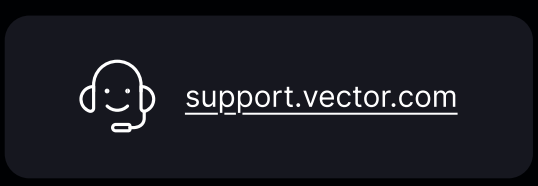

! Ready for the Next Step?

Install the Custom App Demo and code your own app from scratch!
